

## Demountable Wall Assembly

### ESS 100+ Demountable Wall Assembly

ESS designs and manufactures the ESS 100+ wall assembly for all your office and manufacturing plant requirements.

#### Quality

You will enjoy the quality of a permanent office yet have the flexibility to reconfigure or relocate at anytime. The high quality of our ESS 100+ wall assembly product allows it to be used in many industrial, commercial and mercantile applications.

#### Design

The ESS 100+ demountable wall assembly is designed to meet non-combustible building code requirements as a standard. When there is a need to reconfigure or relocate, the ESS 100+ wall system materials are 90-100% reusable. ESS is an environmentally conscious manufacturer and have designed our system to create minimal waste.

#### Installation

Assembly of the ESS 100+ wall system is fast and efficient. Our system eliminates the multi-step phases of compounding, sanding and painting that are associated with conventional type construction. The ESS 100+ wall assembly is pre-packaged and shipped in kit form ready for installation by your maintenance department personnel or alternatively, have our ESS installation team complete the work for you.

#### Optional

ESS 100+ demountable wall assemblies also offer a wide selection of finishes, vinyl covered gypsum panel, prefinished metal panel, FRP panel as well as value added options such as VCT tile, carpet and ceramic tile to name a few. When required, ESS also installs electrical components and fixtures offering you a complete package to create the perfect office environment.
